AFRICA'S FUTURE IS DIGITAL

The advent of digital revolution has affected the foundations of global economy as well as the day-to-day life of people around the world. The vast number of technological innovations, the boom in the mobile sector and the Internet, combined with smartphones' recent revolution, represent a major step for a digital future. As regards our African continent, this revolution most probably conceals an extraordinary potential for development that the countries must definitely grab. For instance, with regard to Internet only, McKinsey consulting firm claims, in its report on digital revolution in Africa entitled "Lions go digital", that "Internet could contribute some 300 billion dollars to Africa's GDP by 2025, compared to 18 billion dollars now". Besides,

analysts and experts agree that all social and economic sectors can take advantage of this revolution, whether on the society or even on the administration and business levels.

However, full integration of Africa in the digital era cannot take place without the involvement of all stakeholders, starting with a clear, coherent vision of public authorities and active participation of all IT and telecom professionals, while taking the cultural factor into account. Digital governance, regulation, technological choices, and universality of services will then come to support the advent of the digital economy.

To this end and since its creation, the Africa IT & Telecom Forum has been working for the development

of telecoms and IT as the main pillars of socioeconomic growth in North, West and Central Africa. The 2015 edition, which will be held in Abidjan, will be no exception as it will be the occasion once again to highlight Africa digital potential. Its purpose will be to discuss the fundamentals required to make the continent benefit from a revolution that is bound to improve the living conditions of the people and the countries' economic performance. Professionals and decision-makers of the sector are thus invited to actively take part in the works of this edition in order to share their experience and inquire about the best practices in the digital transformation area.

Let's meet in Abidjan on March, 26th and 27th!

DAY 1

THURSDAY, MARCH, 26TH

09H00- 09H30	<p>INAUGURAL SPEECH</p> <p>Alain Mascart, President AITTF 2015</p>	12H45-14H00	LUNCH & NETWORKING

SOUTH-SOUTH COOPERATION REGULATORY AUTHORITIES' ROUNDTABLE

The 2015 Africa IT & Telecom Forum will be the occasion for regulatory authorities in French-speaking Africa to meet and to discuss regional cooperation projects.
This meeting will be followed by a joint communiqué or "Abidjan Declaration" to further strengthen South-South cooperation in the telecommunications industry and in the information society in Africa more generally.

18H00

CLOSING COCKTAIL

* Speakers confirmation underway

Translation from and into English will be available during the conference

AITTF 2014

VERBATIMS

SE Bruno Nabagné Koné
Ministre de la Poste et des TIC
Côte d'Ivoire

«Ce Forum permet aux acteurs africains d'échanger... Comme vous le savez il faut montrer à nos populations que les TIC sont une opportunité qui peut contribuer au développement de nos pays ...et ce genre de Forum permet d'enfoncer le clou, d'informer la population et de sensibiliser les acteurs publics (les Etats) de façon à ce qu'ils prennent les dispositions pour créer le cadre qui permet à ces technologies de produire tous leur effets.»

SE Thierry Mougalla
Ministre des P&T
République du Congo

«...Nous devons veiller à ce qu'il y a une parfaite égalité d'accès à (ce) haut débit parce que la Société d'information se veut inclusive.... et comme cela a été souligné durant ce Forum, aujourd'hui, l'utilisation du mobile permet une inclusion financière que les banques classiques ne permettent pas à travers le mobile money... Ceci démontre que ces outils et technologies ont une vocation d'utilisation bénéfique et multiple pour nos populations.»

i-conferences is leader in the organization of B2B conferences for the North, Central and West Africa area with the aim of promoting investment and development of strategic sectors. Our conferences are intended for governments and public authorities, businesses, finance professionals, consultants, jurists, and all professionals involved in the economical development of the continent.

i-conferences aims at offering its audience of economic decision-makers and investors the opportunity to take part in forward-looking debates, to share experience, to benefit from the best practices and to create new contacts.

Since 2004 our conferences have benefited from the support of international and regional economic and political players, which allowed us to build our reputation and to organize successful consecutive editions. Our conferences have thus become major yearly forums for the key players in the region. Cartes Afrique, Africa Infrastructure Forum, Africa Power Forum, Africa Banking Forum, Africa IT & Telecom Forum, Forum Afrisanté, African Insurance Forum are few examples of our conferences.
