BUSINESS OPPORTUNITIES FROM ISRAEL

April 2023

Greetings from the Federation of Israeli Chambers of Commerce!

As part of our efforts to promote business matchmaking for Israeli companies, we give you this monthly edition of our members' business offers. All are looking for new business partners, distributors, representation or suppliers.

Companies who find these offers relevant to them may contact us directly and approach Ms. Yonat Keren: chamber@chamber.org.il

We invite you and your members to send us business offers to publish them on our website business opportunity system.

To post an offer, please [click here](#)

Thank you in advance for your cooperation.

Summary of offer	Complete Solution for Home Sleep Test (HST)

Description of Offer

Our company specializes in the field of sleep tests (Lab Tests and Home Sleep Tests) since 2001.

We developed analysis software, the first in the world to receive FDA approval, and a series of smart recording devices for Home Sleep Tests.

Our company has practical experience of over 500,000 analyses for sleep tests.

We offer a unique system that can perform complete Home Sleep Tests (recording + analysis) for all types of Home Sleep Tests approved by the AASM.

- All our products have been approved by the FDA since 2004.
- The company has patents registered in the USA.
- All our products meet the American AASM standards.
- The company has CFDA approval in China.

System Benefits:

- Allows you to perform sleep tests for an unlimited number of patients every night.
- Allows you to perform an unlimited number of analyses every night.
- The system works on a pay-per-use = PPU business model.
- The system helps the users to:
 - Increase their income
 - Reduce their maintenance expenses

e. The system is particularly suitable for use in countries with wide-spread inhabitants, including countries with extensive population dispersion.	
Other Information	No need of money invest.
Potential Partners	Sleep Labs, Hospitals.
Target Countries	Worldwide

Summary of offer	SaaS Service for Retailers Selling OTC/VMS Online

Description of Offer

We offer a SaaS Solution focusing on OTC, vitamins, and supplements. The solution helps retailers with online businesses to increase their conversion and sales (shopping cart value) by providing a user-friendly and engaging tool to their customers.

Our technology is scientific and written by professional pharmacists and nutritionists. It "talks" to the online consumer just like an actual pharmacist and helps them make the right decision regarding the OTC drug/vitamin they are about to purchase.

For the retailer, the results have already proven themselves (in an Israeli multinational pharmacy chain and one of Israel's four HMOs):

- More users completing the purchasing process.
- Shopping cart value is increased thanks to the complementary suggested products mechanism.
- Users are more engaged, have a lower bounce rate, and have better SEO.
- Personalized data -> returning customers.
- Available 24/7, it can handle thousands of requests at the same time, saving time for pharmacists.

The tool also includes information from the medication leaflets and is adjusted to the country's regulations.

Our solution is safe, simple, and effective.	
Other Information	Please note this is a technological service and not a medical device. (The company does not have a physical product to export).
Potential Partners	Ecommerce websites selling OTC/ vitamins (such as: Walmart, Target, CVS, Publix, Hy-Vee, BJ's, iHerb, Kroger, Shoprite, Dis-Chem, Clicks Group, Amazon Pharmacy, and others).
Target Countries	US, Canada, SA, UK, Australia, NZ, LATAM.

Summary of offer	<i>Smart indoor climate control & dynamic lighting system for agricultural cultivation</i>
<u>Description of Offer</u> 'Mini Planet' is a smart indoor climate control & dynamic lighting system for agricultural cultivation, enabling replicating dynamic sunlight as well as setting the optimal climate for a specific crop to improve productivity and quality of fresh produce grown in any place, at any environment throughout the year. Our system can be used in greenhouses as a complementary system or within indoor growing rooms. Smart farming is precise and comprehensive, providing full control and quick access, which simplifies workflow, improves productivity and corrects human errors. Implementation of smart farming enables agricultural growth in areas close to clients and end users, with the ability of short delivery from production site to your client. Our controlled environment and dynamic light system is suitable for:	

- Commercial indoor cultivation facilities - In extreme weather or light conditions i.e.: Drought, floods, severe cold, heat, darkness, and desert conditions. - Urban farming facilities, local communities, hotels and restaurants, hospitals and elderly care centers. - R&D plant growth chambers and controlled environment rooms for: Agriculture research centers and institutes, R&D labs in commercial indoor farms and greenhouses - Home growers- expert.	
Potential Partners	Companies dealing with greenhouse agriculture Companies dealing with indoor agriculture Agronomists / Agriculturists
Target Countries	USA, Africa, Asia, South America, Russia and Australia.

Summary of offer	• Construction and development of diverse agricultural farms • Consulting and accompanying agricultural projects
<u>Description of Offer</u> Our company specializes in establishing, managing, supervising agricultural production in tropical climates. We offer establishment, consulting and accompanying agricultural projects with the development of diverse agrarian farms, fruit orchards, greenhouse crops, and open spaces. Moreover, we accompany and cultivate all types of vegetables and poultry industries (chicken coops for meat and chicken coops for egg-laying sheds) and provide training to locals in the agrarian sectors. Among the projects we have carried out are the following:	

* The establishment of a farm in Gabon, Africa - accompaniment and project management of diverse agricultural farms, growing vegetables in open areas and greenhouses, planting fruit orchards, establishing and operating chicken coops for eggs, and providing training for workers in the various branches. * Management of the Congo President Farm - producing vegetables and poultry for eggs and establishing additional agricultural farms specializing in chickens and eggs. * Management of productive farms in Central America for vegetable crops, melons, and watermelons for exporting to the United States. * Accompanying agricultural projects in Mexico for marketing and exporting to the United States.	
Potential Partners	Farm owners interested in business and professional cooperation, UN aid organizations, Ministries of Agriculture.
Target Countries	Central America, South America, Africa.
